Evidence selection and exact-lookup specificity
Authentic
Five scrambled seeds
a Exact reservoir lookup
Distinct queries matching (%)
Scrambled: 9–13 residues
Peptide length (residues)
b Length-specific denominator
Distinct authentic queries
Peptide length (residues)
c Length sensitivity
Selected proteins (median)
Accepted peptides
Count (thousands)
Minimum lookup length (residues)
d Score-fraction sensitivity
Selected proteins (median)
Accepted peptides
Count (thousands)
Top-scoring predictions (%)
